Virtual Maize Navigation Training

*Technology #7170*

**BACKGROUND**

Computerized cognitive training program designed to improve cognitive function in older adults.

**TECHNOLOGY**

Program is unique in specifically targeting hippocampal- and frontal-based brain functioning. Participant moves through a game-like environment involving a series of interconnected hallways and alleys.

**APPLICATIONS**

Cognition in aging, medical illness, and dementia
Child neurodevelopmental issues

**ADVANTAGES**

Interactive
Game-like
Self-paced
Computer-based
